

RORTECH

AI Adoption Workshop Programme From Awareness to Action

A structured, low-risk programme helping business leaders to adopt AI safely, practically, and with confidence.

75%

of employees
already use AI

60%

of businesses
lack an AI strategy

59%

worry about
measuring ROI

Business leaders constantly tell us:

- “We know AI matters, but where do we start?”
- “We’re worried about data loss and exposure.”
- “We want outcomes, not hype.”
- “How do we prove value and ROI?”

**AI is already being used
inside most businesses...
often without visibility,
governance & consistency!**

This programme exists to help business leaders answer 3 questions:

Where does AI actually make sense in our business?

What’s worth actioning now, and what isn’t?

How do we adopt AI safely, with governance and ROI clarity?

This programme gives you a structured, low-risk way to move forward.

Six workshops delivered weekly:

1. AI landscape & opportunities
2. Practical AI use cases by function
3. Tools & live demonstrations
4. Process mapping & AI integration
5. AI risk, security & governance
6. Building your AI adoption roadmap

Each session includes:

- Teaching & demos
- Hands-on workshop
- Peer discussion
- Clear actions

This is not classroom learning — it is working strategy sessions for your business.

Doing nothing about AI isn't neutral; it's growing competitive disadvantage.

Businesses that are adopting AI are achieving:

Faster delivery with fewer resources

Real-time insights & smart decisions

Lower costs, stronger margins

Scalable, system-driven operations

What your business will gain from the programme

By the end of the programme, you're not just "AI aware" - you know what you're doing next, who owns it, and why it matters.

5-10 prioritised AI use cases

1-2 mapped AI workflows

Draft AI policies & guardrails

FREE 1-on-1 onsite session, tailored to your business' AI adoption journey

Completed workbook

Process/roadmap templates

Prompt library

Common benefits of AI adoption:

2-5hrs saved per employee/week

Leaders reclaim strategic thinking time

7-15% productivity uplift

"We don't sell tools. We help leaders make confident, informed decisions about AI."

Adam Blackwell
